Description The Danalock is a doorlock with a integrated motor, which you place on the inside of your front door. You can control it with a smartphone (via Z-Wave Gateway or directly via Bluetooth). The Danalock fits to every door with a mechanical Euro profile cylinder. Easy installation - without drilling holes For the installation of the lock your existing cylinder is replaced by a Danalock cylinder and the doorlock with the motor will be attached to it. Battery empty or Smartphone lost? After the installation you can unlock the door with a physical key any longer. On the outside of the door you can use the key and inside you can lock/unlock it manually. Auto-Lock Let the door lock automatically when you leave your home. The auto-lock-function locks the door automatically after a predefined time. Properties: Z-Wave Plus & Bluetooth Version EU frequency: 868,42 MHz (Z-Wave) Package content: 1x Danalock V3 incl. Batteries (without lock cylinder) Power supply: 4x CR123 Battery lifetime: 6-12 month torque: 1,5 Nm
